

Siva Kaviya, Trichy Siva Raman is a Junior Power System Software Engineer working for the IPSA Software & Solution Team of TNEI, based in Manchester. She completed her master's degree from TU Delft, Netherlands specializing in smart grids. She has over 2+ years of professional work experience in Java Development followed by six years of Academics Experience in the field of Power Systems and Smart Grids with a good understanding of the European Energy Markets. She also has significant years of experience developing software tools and scripts in the realms of power system in the domains of data integration, energy integration, analysis modules. She is currently working as a volunteer for CIGRE UK NGN Events Committee Co-ordinator & International Representative.

Full Name – Siva Kaviya, Trichy Siva Raman

CIGRE UK NGN has been great in helping me getting to know more people across the energy domain, where I have gathered good friends, considering I'm new to the UK. I really enjoyed working with the CIGRE UK NGN committee as event coordinator and organizing many insightful events, also establishing more connections across countries, and learnt new things. I would like to continue the collaboration further and learn more, inspire more people to join and attend NGN events.

I have few potential collaboration events in pipeline for next year including potential visit to the National Grid Control sometime during spring next year, as outcome of the CIGRE Paris event. I'm hoping to add my valuable contribution to the event team as a Lead.
